

Morgenlicht Technology – Open application

Morgenlicht is an early stage tech startup from Cologne, Germany. We are working on a new hardware product category in the Mixed-Reality Space. We are currently setting up the team that drives the project and build a sustainable lasting business.

Morgenlicht Technology is a purpose driven company that is built on principles of a shared ownership and building positive relations with all stakeholders involved. Our mission is building sustainable products and businesses throughout all processes.

How do we work?

- We are ambitious building outstanding product experiences and pragmatic finding solutions and efficiently.
- We challenge conventions and seek unique solutions that align optimally to the task at hand.
- We work in an environment in which everyone can be fully themselves for a culture of authenticity and free communication.
- We believe that diverse teams are most stable and productive, profiting from different work and personal experiences, various backgrounds, and identities.

Why should you join?

- Develop and define an innovative mixed-reality product for an emerging market, revolutionizing a product category still finding its niche.
- Join a purpose-driven tech startup, shaping its future collaborating with a like-minded team, in a way that hasn't been done before.
- Acquire a diverse skill set building a startup from the ground up, discovering your role and fostering personal and professional growth along the way.

How to continue?

As the cultural and personal fit is more important than the background or the product space, please read carefully if you agree to the ways Morgenlicht is working. If you feel you would like to contribute to this, lets connect!

Please send an email to goodmorning@morgenlicht.tech with your **name and the position** in the subject. Please share

- a CV and a short description of your motivation
- a one-minute video of you explaining what you can contribute to Morgenlicht and how you see your role
- five emojis for topics you like talking about.
